
[done] bypassing the welcome page

Posted by jay1982 - 2008/03/28 13:39

hi all

i am using a welcome page which collects some user details and once the user clicks continue button the questions page should appear. Here my problem is lime_survey starts with a "welcome" page then the questions page appears. Is there any way to by pass the welcome page and directly link to the questions page ?

for eg: <http://index.php?sid=xxxx&lang=hi>, this link leads to the welcome page , i want to directly link to questions page , is there any way to by pass the welcome page

version:1.70

many thanks

regards
Jay Jay
