
[done] Very Impressive - The BEST I've Seen Yet

Posted by votingpoll - 2008/04/02 11:27

Hello everyone,

I didn't know where to put this post, so please forgive me if it's in the wrong section.

I just wanted to tell you that I'm so impressed with LimeSurvey. I've never seen a FREE survey program do as this one does. I'm just baffled. It has all the features that I always wanted in a survey program, but never found them. It also has features that I never thought of either.

One of the main reasons I like LimeSurvey is that it has tons of features and options to work with. And what makes it even better is the fact that it's open source. Open Source is no joke. All the programs I've come across that are open source are waaayyy better than the paid programs of the same type.

The demo actually convinced me. It was better than just seeing. I was doing and it was like a new toy for me. I was getting too involved with the demo immediately, and I didn't want to end my session.

Great job, and well praised by myself, and I'm sure by many more people too. LimeSurvey should have no problem getting to the no#1 position for survey software, and especially because it's open source and FREE.

Question... Does LimeSurvey have the capability of displaying the results to the visitors?, or do I need a "polling" software for that? I would like to be able to let people see results of the tests before and (or) after taking the survey. If it doesn't do that, are there any plans on making it possible?

Thanks for your valued time and great product.

Kevin

Thanks a lot for your nice words! Comments like this motivate the developers to work on new features.

Comming back to your question: There is no official feature that supports your needs but another user has created an easy workaround. Take a look at "Adding option for survey users to view survey results".

Thanks for the link. Looks like someone is already on it. That's good. But still, I'm going to be using this for my site. I see no reason not to.

Kevin
