
[done] Who do I speak with regarding development

Posted by br8kwall - 2008/04/09 17:07

We might need to get some advanced features added to Lime which would need to be done quickly. For these we'd like to hire a core Lime developer or two. How do we go about that if the need arises?

Hi,

what exactly do you want to do? Which features are missing?
