
[done] remove question code

Posted by marcoaken - 2008/05/15 16:11

Example: 1a: How many roads must a man walk down?

I want to remove the "1a" label. I using a difficult / unclear coding scheme for the questions. -> check image attachment!

Someone?

No image!

Which version and build?

Some more information will be quite helpfull.

Hi,

To do this you must to edit your template.....

Select your template used for the survey

go to the screen "question Page" to edit the file question.pstpl

and remove {QUESTION_CODE} in this line :

{QUESTION_CODE}: {QUESTION}

your line must be like this :

{QUESTION}

=====
