
[done] Use some answer in later question

Posted by Flo51 - 2008/05/19 17:32

Hello,

I'm a new Limesurvey user and I'm looking for a way to use some answers in later questions. Is there a method to do this with Limesurvey ?

Thanks for your great work.
Flo

Plz have a look at the manual:

http://docs.limesurvey.org/tiki-index.php?page=Adding+A+Question#Information_from_previous_answers

If I've well understand the doc, if I use "ber1" at the end of "{INSERTANS:65443X2X5ber1}" (in my case) I should have the first result of the precedent question (which is radio with comment : and I want to use the first comment then the second...) ?

Regards,

Sorry, I don't understand your problem. If you are not sure how a feature is working just play around with it a little bit. This is the best way to learn.
