
File not exist surveyRuntime.js printablestyle.css

Posted by simonx - 2008/07/24 18:41

Dear All,

I'm getting the following in my Apache error log:

File does not exist: /var/www/admin/scripts/surveyRuntime.js, referer:
http://server/admin/admin.php?action=previewquestion&sid=12345&qid=6789
File does not exist: /var/www/admin/styles/default/printablestyle.css, referer:
http://server/admin/admin.php?action=showprintablesurvey&sid=12345

surveyRuntime.js is in /var/www/scripts/surveyRuntime.js
.. printablestyle.css doesn't exist anywhere!

surveyRuntime.js is referenced in common.php line 2129:

"\n"

I think it happens when preview while designing.

printablestyle.css is referenced in admin/printablesurvey.php line 31:

.\n"

Changing the path to surveyRuntime.js would work while admin-ing, but might it break things when doing survey?
..where is printablestyle.css?

Cheers,
Simon

Please check if these files are within your zi archive you downloaded.

Another option is to download the latest release and check if these files are available.

Are these errors only shown in the apache error log or do you see any errors when running limesurvey in debug mode?

Sorry, should have amended.. put in bugtracker:

<http://bugs.limesurvey.org/view.php?id=2340>

Same happened with 1.71+ 5100 and 5326
