
[done] Check if all questions be filled

Posted by publi**t**b - 2008/07/25 03:04

I have a survey with 20 pages. I'd like to let users to fill up all questions in every page before they move to the next page.

Is here any way to tell the users that they missed a couple of questions, such as prompting up a message window to show them which question was missed?

Thank you for any suggestion!

Hi, just set every question to mandatory.
