## new template survey with column

Posted by gerejejr - 2008/08/28 13:09

---

Hi everybody,

I would like to create a new template survey with template editor.

Here I scanned my template :

<http://www.limesurvey.org/images/fbfiles/files/champ-d618c3cbd677c42b9c1ad2dbb321f92a.gif>

My problem is that I don't know how can I do to put comments beside the question and not below?

Thanks for your advice.

The layout of the questions are hard-coded into the "qanda.php" file. If you need to change the way a particular question type presents, it needs to be done through there. You'd need some php skills to do it safely.

The templates can change general layouts, but not internal question layouts.

Jason

Is not possible to do this with the file question.pstpl?

thanks
