
HTML Editor offline... how can I activate it !!??

Posted by Feorod - 2008/08/29 18:05

Hi all,

Installed LS 1.71+ and the HTML editor is not activated. We tried to activate it in the "System Info" tab, but nothing happens.

What are the settings to configure in order to activate it in the question editor and the text editor...???

Thanx in advance,

Eric
