
[done] Restarted Apache

Posted by papageno - 2008/09/05 16:47

Hi,
I restarted Apache.
I have the message:
The Apache service named reported the following error:
>>> Syntax error on line 64 of C:/xampp/apache/conf/extra/httpd-xampp.conf: .

The line 64 of C:/xampp/apache/conf/extra/httpd-xampp.conf is

```
Alias /limesurvey â€œC:/xampp/htdocs/limesurvey/â€•
```

```
AllowOverride AuthConfig  
Order allow,deny  
Allow from all
```

Thanks

Maybe I found the solution!
If the "limesurvey folder" is in the "htdocs folder" the code

```
Alias /limesurvey â€œC:/xampp/htdocs/limesurvey/â€•
```

```
AllowOverride AuthConfig  
Order allow,deny  
Allow from all
```

in C:/xampp/apache/conf/extra/httpd-xampp.conf is not necessary!

Is so?

Thanks

This is an apache configuration error and isn't connected to limesurvey.
