
[done (?)] mandatory question

Posted by startx25 - 2008/05/15 20:40

Hi everybody

I use a mandatory question in a "question by question" survey.

If somebody forget to fill a response, the mandatory message appear but after that, the complete page is reloaded.

how can I avoid this complete reload ?

I will to check the question by javascript before the submit function is called.

Anybody have some idea to do this by javascript ?

Which version and which build do you use?

If you can reproduce the problem on the latest version, plz submit a bug-report!
