## Layout

Posted by sgonzale - 2008/05/28 16:49

---

Im having problemas creating new layouts. Apparently I don't enough rights to create a New Layout. Thing that made me wonder if it is a problem with the tool itself or with the people who administrate the data bank. But I already talked to them and they are telling me that I have all the rights. Perhaps can anyone help me.

Are you really using Limesurvey 2.0? This one is not released yet but you have posted in the limesurvey 2.0 subforum.

Im having problemas creating new layouts.

1. Can you describe this in more detail? What did you try to do exactly?
  2. You can't change the default template.
  3. You need write permission on the template folder for editing templates.
  4. Which release and build of limesurvey do you use. There are no know errors with the template editor.
