
How to edit \"One or more mandatory questions...\"

Posted by adewaal - 2008/06/29 01:56

I have searched all my files for the text string "One or more mandatory questions have not been answered. You cannot proceed until these have been completed."

I would like to edit this sentence. Could anybody please tell me which file to edit?

Look here: <http://docs.limesurvey.org/tiki-index.php?page=LimeSurvey+1.x+Translating+LimeSurvey>

You can edit English like any other translation.

Thank you Carsten

I have done all the necessary things and opened en.po in poedit, found the string I want to edit (translate), edited it in the 3rd window but when I save the .po file I get this error: "Some header fields still have the initial default value". So I cannot make the edit stick. Must I copy all the strings over to the translated field, even the ones I have not edited?

Thanks again. <http://www.limesurvey.org/images/fbfiles/images/poedit.gif>

Please follow the steps mentioned at the manual. When following these instructions everything should work fine.

Furthermore you can try to google the error message (which is unknown to me) and read the poEdit manual.

I received the same error message attempting a similar adjustment to a string in the en.po. Unable to successfully troubleshoot by searching for the error text in google. Any other insights?

Thanks!

Noah
